

## Built for Research Funders

Altum Analytics is a cloud-hosted reporting platform that comes with predefined dashboards to explore your ProposalCentral funding data, benchmark performance, and make more informed decisions. Altum Analytics Plus includes access to an expanded collection of dashboards and the ability to create custom reports.

We live in the era of big data. The grants management space is no exception. Every day, volumes of information are created and high-performing funding teams need analytics to cut through the noise and make sense of it all. Grant making teams that can turn data into information and information into understanding are poised to thrive.

### The Challenge

Many funding organizations are still reliant on Excel and manual processes for managing their data. This is both time consuming and error prone. In addition, the ever-increasing pace of research means that data volumes are growing at an accelerating pace. As a result, many grant making organizations struggle to answer fundamental question like:

- Where, on what, and with whom are we spending our money?
- How much did we invest in specific grantees and what was the impact on their careers?
- What is the distribution of my grants by institution and what inventions have been created as a result?

The ability to easily and accurately measure and report on grant making performance is an organizational necessity.

### The Solution

Altum Analytics is a cloud-hosted reporting platform that empowers funders to make better decisions daily, creating a truly data-driven organization. Altum Analytics is fully integrated with ProposalCentral. All of your ProposalCentral grants and award data are available for query and visualization in Altum Analytics.

Altum Analytics comes with pre-defined dashboards to support executive leadership, scientists, and grants managers. The solution lets users explore data, uncover hidden insights, and make more data-driven decisions.

The tool aggregates and summarizes all your grants data, shows where program dollars are being invested, and quantifies and visualizes the outcomes associated with awards. In addition, Altum Analytics includes dashboards on key operational performance areas like grant-making efficiency and program cash flow.

Altum Analytics is available on desktop or mobile with a fully responsive design that adapts to your screen size.

### Key Capabilities

Predefined reports provide visibility into grant making performance helping funders make better decision daily

Intuitive UI lets users explore data, uncover hidden insights, and make more data-driven decisions. Search and explore across all your data in any direction and instantly pivot your thinking based on what you see.

Unmatched performance and support for both desktop and mobile

# Altum Analytics Dashboards

A multitude of predefined dashboards and reports provide visibility into grant-making performance - helping funders make better decisions daily.

## Count Dashboard

Shows where, on what, and with whom you are investing your grant dollars.

- Grant dollars by research area
- Grant dollars by geography
- Grant dollars by institution
- Timeline of application and award transactions, including total by year and by program

## Grantee Career Dashboard

Amount invested in specific grantees and the impact on their career

- Initial and subsequent grant amounts to awardees, individually and aggregated by year
- Publication volume by year before and after initial award to assess career progression
- Follow-on awards by year before and after initial award to assess career funding progression

## Financial Dashboard

Current cash flow status of my grant payments

- Distribution of funding by budget category across grants and programs
- Distribution of program dollars between personnel and non-personnel expenses with drill down
- Payments and refunds made and due by year

## Institution Dashboard

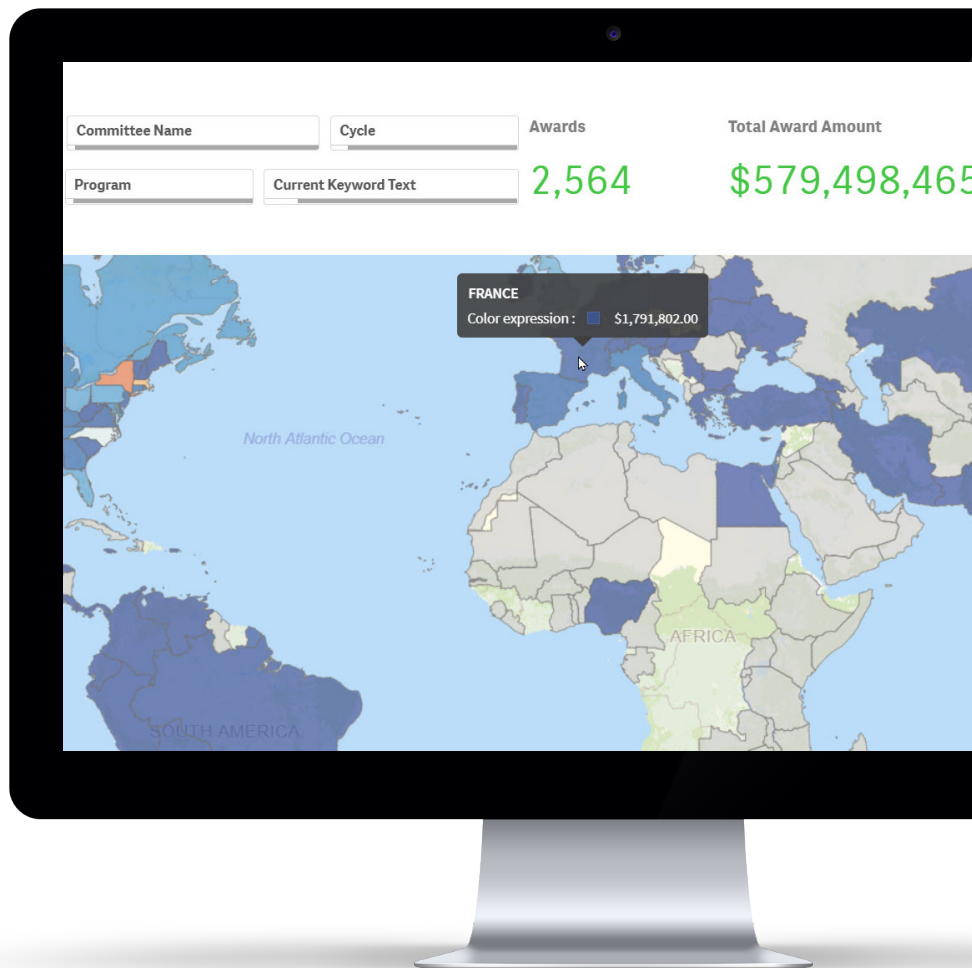

Distribution of grants by institution and intellectual property created

- Application and award volume by institution
- Total funding by institution
- Patents, licenses and other intellectual property associated with grants by institutions

## Process Dashboard

Grant making process performance and opportunities for improvement

- Duration of time for applicants to complete applications
- Duration of time for review cycle from application to award decision
- Grantee on-time deliverable performance rate
- Duration to review and approve submitted deliverables

Example screen: Example dashboard showing grants made by region and country.

## Altum Analytics Plus

With Altum Analytics Plus, users get additional dashboards plus access to a benchmarking capability enabling you to compare your organization's performance against anonymous benchmarks from organizations like yours.

In addition, Altum Analytics Plus provides the ability to create, edit, and publish custom reports. You also receive support from Altum's in-house reporting experts to help define and create custom reports.

### Key Capabilities

All the capabilities in Altum Analytics above plus

- Ability to create, edit, and publish your own custom reports.
- Benchmarking data enabling organizations to compare their grant making performance to their peers
- A Diversity Dashboard to assess the diversity of your awardees vs. similar foundations
- Support from Altum's in-house experts for custom report creation

## Altum Analytics Plus Dashboards

Altum Analytics provides additional dashboards and reports including Benchmarking data to compare your organization's impact against anonymous peers, as well as a Diversity dashboard to assess the diversity of your awardees vs. similar organizations.

### Benchmarking Dashboard

**Compare your grant making performance against industry benchmarks**

Compare your organization's funding impact against benchmarks

- Your awardees Post-Award funding dollars received vs benchmarks
- Your awardees publication rate versus benchmarks
- Your applicants on-time submission performance vs. benchmarks
- Your team's application close-out performance vs. benchmarks
- Your grantee deliverable performance vs. benchmarks

### Diversity Dashboard

**Composition of applicants, grantees, and reviewers by key demographic factors**

- Distribution by gender, race, ethnicity, degree type, and career stage
- ORCID adoption status for applicants, awardees, and reviewers

**Did you know?**

All ProposalCentral subscriptions include access to Altum Analytics and Altum Insights.
